

ClearLight™ 4x Lens Technology

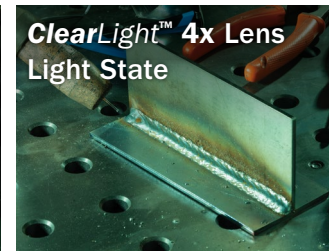

WHEN IT COMES TO CLARITY, THE CHOICE IS CLEAR.

UP TO **4X** THE CLARITY
FOR THE VISIBILITY YOU NEED

Advanced high-definition optics deliver a clearer, brighter, more realistic view for every stage of every weld. The difference is clear—100% of welding experts prefer **ClearLight™ 4x** over 1/1/1/1 lenses based on a blind helmet study between Miller and competitors.

Clarity and Productivity

- Up to 4x the clarity compared to welding helmets with 1/1/1/1 as per official USA ANSI certification of lens visibility
- Welders can keep their hood down between welding and non-welding tasks within arm's reach of the workpiece for improved safety and productivity

Better Quality and Color

- With a brighter light state, welders can better see their workpiece, puddle and wire
- Allows more colors of the visible light spectrum for accurate color, less blue, green or yellow tints

SEE MORE CLEARLY IN DIFFERENT STYLES AND DESIGNS.

ClearLight™ 4x is available in all Digital Performance™, Elite™, Infinity™ and T94™ Series Helmets*

*T94i™ XL helmets have ClearLight™ 2.0 Lens Technology
